FAQs

Q: AutoCAD work arounds are working just fine – why should we use KeySCAPE LandCADD?

A: KeySCAPE LandCADD reduces production time by 40% over AutoCAD. It was created to streamline the workflow specific to landscape architects allowing easy integration with Civil 3D and Revit. As the infographic shows we accelerate your processes through automation and elimination of duplication. What the organization does with the increased client work capacity is up to you. But wouldn't it be great to get more client work done faster? And how would that impact your ability to generate revenue?

Q: Does KeySCAPE LandCADD work with AutoCAD, Civil 3D and Revit?

A: Yes, KeySCAPE is a plugin for AutoCAD and Civil 3D. We also have a translator for Revit.

Q: Good software will save time but we still have to invest time to learn how to use it. How long does it take to learn KeySCAPE LandCADD?

A: Given you're already using AutoCAD, you already know how to use 85% of KeySCAPE LandCADD. We hold live webinars to help users get more out of the tool without taking up valuable design and production time. Your license provides unlimited phone support on demand and we can also provide group training specifically tailored to what your team wants to streamline first.

Q: How does pricing work and what does KeySCAPE cost?

A: We offer several pricing models from outright purchase to subscriptions models that include annual, quarterly and monthly options. It depends upon how your organization capitalizes software acquisitions, what kind of licenses you need, how many you require and what software you already have. Single license Costs range from \$150/month to outright purchase of \$2,975 for a single license. Network licenses and those containing their own AutoCAD engine are slightly more.

Q: Is KeySCAPE LandCADD BIM compliant?

A: Yes, we are BIM level 2 compliant.

Q: We already use Land F/X – why are you better than Land F/X?

A: KeySCAPE LandCADD impacts your entire process from early conceptual work through final construction documentation. This streamlining of creation and revision steps is combined with an ability to integrate with Civil 3D and Revit. Collaboration with important civil engineering and architect partners helps ease the design process whether those partners are internal or external ensuring those relationships remain close.

Q: Are graphic standards customizable? leaders, text, notation, etc.

A: Our tools help unify your offices CAD standards presenting a consistent look and feel to your drawings and documents.
