

Top 10 benefits to using AutoSTRIPE

1. Uses rule based road striping – ensures compliance with local Traffic Standards
2. Allows for ‘custom’ symbols and lines to be defined
3. Supplied with a comprehensive set of standard, MUTCD symbols, arrows and line types
4. Supplied with road text font matching local Traffic Standards
5. Multiple objects are drawn as ‘Street Features’, and can be edited as one.
6. Easy editing enables different proposed ‘what if’ designs to be tested quickly
7. Street Feature geometries can be shown simply by switching a representation property
8. Quantity take-off is a given and can be tabulated for any Street Feature type automatically, which can be output in comma separated value (CSV) format.
9. Flexible labelling routines allow for a design to be annotated using pre-defined and editable text
10. 3D Driver’s Eye View routines ensure sightlines are clear

These unequalled features make AutoSTRIPE irreplaceable; you’ll wonder how you ever worked without it!
