

Who?

Landscape Architects and
Landscape Designers

What?

A single solution that enables
you to quickly create small or
large landscape projects

Why?

Cuts your design time in half,
eliminates errors and
improves collaboration

WHO IS KEYSCAPE FOR?

KeySCAPE is made for landscape architects and landscape designers.

WHAT IS KEYSCAPE?

KeySCAPE is an add-on for AutoCAD which offers a comprehensive suite of tools enabling you to quickly create small or large landscape projects without the need for additional software.

GENERATE A TOPOGRAPHIC FROM SITE DATA

CREATE SECTIONS FROM GROUND MODELS

WHY CHOOSE KEYSCAPE?

KeySCAPE cuts your design time in half, eliminates errors and improves collaboration allowing you to better respond to your clients needs, build credibility and win more business.

KeySCAPE relies on a single source of the truth. Its extensive features inside one AutoCAD package mean there is no need to keep switching between multiple applications or maintain several copies of files in different locations, just create and edit once. This reduces the risk of error, saves you time and aids smooth collaboration on projects.

The flexibility of KeySCAPE allows you to customize the system so workflows can be streamlined. Compliance to industry standards means more time can be spent designing and less time ensuring conformance.

KeySCAPE is available to run on the currently supported versions of AutoCAD and Windows and is available as a standalone application (KeySCAPE LT) that includes its own AutoCAD (OEM) engine.

KEYSCAPE

AT A GLANCE

- 3D visualization and plotting tools
- Ground modeling and site assessment
- Generate your own product graphic libraries
- Unique pattern polyline creator/manager
- Export to Autodesk Revit and IFC for BIM collaboration
